

# CODE YOUR FUTURE

## FREE MIDDLE SCHOOL SUMMER CAMP

Join us at an awesome six-week summer camp where you will learn how to create your own computer games and how to design and build your own websites. We will teach you programming languages like Scratch, Java, and Minecraft. You will make new friends as you learn to code, go on field trips, and play outdoors with your fellow campers. This will be a great community of students and mentors. We offer a field trip every week, including trips to places like Centurylink Field and Amazon. This will be six weeks of fun, creativity, and inspiration. Please join us! You can apply at our website [www.computingkids.com](http://www.computingkids.com) at the tab on the upper right of the home page. The deadline is May 6th so please apply now!

### CODE YOUR FUTURE
